

MT FYANS
WIND FARM

PROJECT UPDATE

Mt Fyans Wind Farm is located in Victoria's Southwest Renewable Energy Zone.

When approved, the Mt Fyans Wind Farm will host up to 81 wind turbines, and generate around 400 megawatts, enough energy to power an estimated 280,000 homes – around all of the Victorian Western districts and Ballarat and Bendigo regions.

Finalising the project design

Following extensive consultation with project landholders, neighbours and the community, the number of turbines for the project has been reduced from 85 to 81. The change in design will help to reduce visual and noise impacts and further reduce environmental impacts.

The wind farm's proposed transport route has also been changed to avoid oversize vehicles travelling in close proximity to Mortlake and all traffic to the site will now use the Hamilton Highway.

Feedback from the community and local agencies has been invaluable in refining the project's design.

Planning Application submitted to DELWP

The Mt Fyans Wind Farm has reached another milestone, submitting a amended Planning Application to the Department of Environment, Land, Water and Planning (DELWP) in late August.

The Planning Application was updated following extensive consultation and feedback from the community and project stakeholders.

The Planning Application will be reviewed by DELWP and agencies such as CFA and Department of Transport. When the review determines that the application is comprehensive and complete the application will be placed on exhibition available for public review. A public notice will appear in local papers advertising when Public Exhibition is open.

Planning Application USB

Want to receive a copy of the Planning Application?

Send us an email with your name and address, and when the Planning Application is on public exhibition, we'll send you a copy of the documents on a USB.

The Mt Fyans Wind Farm project team speak to community at the October Mortlake Market

Mortlake Market a success

The Mt Fyans Wind Farm hosted a stall at the October Mortlake Market this year.

The Market was an opportunity to speak to locals about the project and provide an update on progress.

Thanks to all who dropped by to speak to the project team, ask questions and share their feedback.

Project Director Giles Rinckes with Mortlake Recreation Reserve Committee and representatives of the Mortlake Cricket Club

Celebrating the opening of new Mortlake Recreation Reserve facilities

Project Director, Giles Rinckes joined the Mortlake Recreation Reserve committee to celebrate the official opening of new Mortlake Recreation Reserve Facilities.

Mt Fyans Wind Farm donated \$50,000 to build a new helicopter emergency landing area. Also opening were a new light system, turn and sprinklers.

The new all-weather emergency helicopter landing area will streamline patient transfers by allowing emergency helicopters to land on a new hard surface at the Mortlake Recreation Reserve. Previously ambulances have needed to drive onto the grass to meet helicopters and would often get bogged.

Mt Fyans Wind Farm is committed to supporting local projects in Mortlake.

Speak to the Project Team

When the Planning Application is on public exhibition, we'll be hosting drop-in sessions where you can hear about the project and ask questions. We'll provide more information about these when the Planning Application is on display.

You can also drop into our Mortlake shopfront at 115 Dunlop Street to speak to the project team. We're open on Tuesdays and Thursdays from 9:30am - 2:30pm.
